Phnom Penh, Cambodia

Summary

I am a Data Analyst student at the Institute of Technology of Cambodia. I have experience in data analysis, SQL, Power BI, Excel, and Python, with a strong foundation in data visualization, statistical analysis, and database management. Through academic and personal projects, I have developed skills in transforming raw data into meaningful insights to support decision-making. I am seeking a Data Analyst Internship where I can apply my analytical skills, gain hands-on experience, and continue growing in the field of data analytics.

Education

Department of Applied Mathematics and Statistics
Institute of Technology of Cambodia
2024 – Present
GPA 3.5/4.0 (3rd Year)
GPA 3.5/4.0 (4th Year)

Department of Mechanical Engineering
Institute of Technology of Cambodia
2023 – 2024
GPA 3.0/4.0 (1st Year)
GPA 2.0/4.0 (2nd Year)

General English Program
Australian Centre for Education (ACE)
2025 – Present

General English Program
Camfirst School
2016 – 2018

Work Experience

Data Analyst Intern Jul 2026 – Sep 2026
Telecom Cambodia, Strategy & Corporate Development

- Built and delivered 2 Power BI dashboards (Traffic Analytics and Sales Performance & Churn). Both run in production and were completed on schedule with zero late tasks.
- Automated daily traffic reporting with a Bash ETL pipeline (MySQL, rclone, OneDrive, Power BI scheduled refresh), replacing a manual monthly process.
- Modelled 40,330 subscription and 362,792 invoice records in a star schema, using Power Query M and 54 DAX measures.
- Presented findings to management. The Sales dashboard was accepted by the Director General of Telecom Cambodia.

Volunteer & Activities

ITC Volunteer 2022 – 2023

- Provided logistical support
- Organize the openhouse events
- Guided Attendees to tour all laboratories

Sea Game Volunteer 2023

- Provided guidance on hotel locations, transportation, and event venues to ensure smooth arrivals and check-ins.
- Acted as a point of contact for visitors by offering directions, answering questions, and coordinating with other volunteers to deliver efficient hospitality services throughout the event.

Dc Lab Robotics 2023 – 2024

- Engaged in pre-intermediate research and hands on project focused on robotics systems design, coding, and integration.
- Collaborate on building and programming autonomous robots, blending mechanical engineering with control systems.

Key Projects

Sales Performance & Churn Analytics Dashboard 2026
Telecom Cambodia

- Built a 6-page Power BI report on 40,330 subscription and 362,792 invoice records, with a star schema and 54 DAX measures (churn, retention, MRR, ARPU, receivables).
- Cleaned API data with Power Query M and checked record counts with SQL against the operational database.
- Found that wholesale ports are 36.1% of records but only 5.1% of recurring revenue, and that 24.0% of invoiced revenue (USD 7.51M) comes from non-subscription customers.
- Published to Power BI Service with scheduled refresh. Accepted by the Director General.
- **Technologies:** Power BI, DAX, Power Query M, SQL, REST API, Star Schema.

Skills

- Management Skill
- Data Analytic
- Create Dashboard
- Data Visualization
- Teamwork
- Communication Skills
- Time Management
- Database
- Microsoft Tools

Traffic Analytics Dashboard & Automated ETL 2026

Telecom Cambodia

- Wrote a Bash ETL script on a CentOS/MySQL production server. It extracts daily Transit and VoIP traffic, uploads to OneDrive with rclone, and triggers a Power BI refresh at 09:00 every day.
- Designed a 5-page dashboard for 5 domestic carriers and 13 VoIP partners, with DAX-generated key insights that re-word themselves daily.
- Validated the ETL output against the previous pipeline row by row, with no discrepancies.
- **Technologies:** Bash, MySQL, rclone, Cron, OneDrive/SharePoint, Power BI, DAX, Power Query M.

Bilingual Chatbot (Khmer - English) 2024 – 2025

- Developed a bilingual (Khmer-English) AI chatbot capable of answering educational questions using Retrieval-Augmented Generation (RAG).
- Collected and processed Grade 12 Khmer textbook datasets to create a knowledge base for subject-specific question answering.
- Built an end-to-end Retrieval-Augmented Generation (RAG) pipeline, including document collection, text preprocessing, chunking, embedding generation, and semantic retrieval.
- Integrated GPT-4o with a vector database to generate context-aware responses grounded in textbook content, improving answer accuracy and reducing hallucinations.
- **Technologies:** Python, GPT-4o, LangChain, FAISS/ChromaDB, NLP, RAG.

Intelligent Face Attendance System Using YOLO11 & ArcFace 2026

Applied in IEEE Conference in Malaysia

- Developed an AI-powered attendance system using YOLO11 face detection and ArcFace facial recognition for real-time student identification.
- Built a schedule-aware attendance validation system integrated with PostgreSQL to automate attendance tracking and prevent duplicate records.
- Designed a Streamlit dashboard for attendance analytics, reporting, and administrative monitoring.
- Achieved 100% face detection rate during evaluation and deployed a complete end-to-end computer vision pipeline.
- **Technologies:** Python, YOLO11, ArcFace, OpenCV, PostgreSQL, Streamlit, ONNX Runtime.
